Hello Maya members in the months of August and September are the slow times at the club.

All the leagues are done and everybody is getting doing their final adjustments on their bows. Good luck to all you hunters.

By next newsletter I should have more to talk about.

Till then see you at the club...

Hello Maya Member's

Maya Archers welcomes all of the new members to the club, thanks for joining our range. There are still a few more target lanes left to sponsor if anyone is interested in maintaining a lane. Don't forget that there is a work party on the second Saturday of each month for those that want to work their due's down. Don't forget to have your membership I.D. card visible when on the range. The range is pretty dry now so there should be no smoking on the range [Smoking is only permitted outside the gates by the dumpsters]. There is also an officer position open also if anyone is interested in taking over it would be for VP of targets. There are a lot of animals on the range; still there is no shooting at the animals. If you have a pet that you bring to the range, your pet should be on a leash at all times and is not to be let loose to roam free on the range. If you have any questions on the range rules, there are rule print outs in the clubhouse. Whenever there is an event going on at the range, there are refreshments in the clubhouse to purchase especially on hot days. Shooting on the range is all about having fun and being safe. Hope to see you out there and at the work parties.

Brad Hastings—Range Manager

Range Manager -  
Brad Hastings

The 2015/2016 calendar year membership list has been moth-balled and the 2016/2017 membership list is now exported to the email distribution website. If you did not receive a copy of this email and think you should still be receiving the emails, please let Dave Baker and myself know so we can see why your membership number is not on our active list. The email distribution went from XXX members to XXX, this seems like too many to have dropped for the coming year so please contact us if you are not getting these emails.

All the emails that are sent out to the club members can be found on our website. From our main webpage, mayaarchers.com, find the email link at the top of the page.

Brent

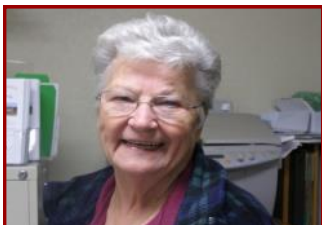

## CBH-SAA

### BROADHEAD CHAMPIONSHIP

LODI BOWMAN, MAY 28-29, 2016

Class Secretary-  
Doloris Newberry

Hello Everyone

Have you wondered what to do on a beautiful Sunday morning?

The second

Sunday of every month we hold our club shoot, the shoot starts at 9:00am, we

shoot 28 targets, 14 in the hunter round and 14 in the target round, 4 arrows to be shot at each target. What a great way to im-

prove our shooting skills, and establish our handicaps. Our club shoot attendance has been way down from previous years, we would like to encourage all of our new members to attend our club shoots. It's a great time to meet fellow archers and have fun shooting. Look forward to seeing you at our next club shoot.

Keep shooting straight  
Doloris

Ken Altman	339	4	1st place

Looking for help decorating the Zombie/ Halloween shoot .

I am looking for volunteers to decorate the lanes again this year. There was a nice turnout last year and I want to thank the club members for the assistance. We can use even more help this year. We need creative people to sponsor lanes. There are some supplies left over from previous years or if you have old Halloween decorations or creative ideas on decorating come share them with us.

Email me or John Tarro if you would like to assist this year.

Brent Pruhsmeier bapruhs@surewest.net  
John taro jtar2@yahoo.com

Dave baker

Alright, we are already in the beginning of the archery season in 'A' zone and before you know it the inland archery hunts will begin for the most part on August 20<sup>th</sup>. I've already made my way into the backcountry to set out my trail cams (11) on a 15 mile loop into a primitive area at 7,000 feet. It's a world of difference there is compared from last year... water, lush vegetation, snow, and abundant sign. I've haven't been this excited about the opening of archery deer season here in California in a very long time.

Now's the time to get out there and do your pre-season scouting before the opener creeps up on you. This is the time to put in the work and miles scouting to ensure that you have an area that you're confident in hunting when the season opens. To go along with that, you might want to have a backup area within your zone as fires or hunting pressure could ruin your initial choice for opening day. It happens as I've encountered fires in the past and having another area to go... so be mobile and don't confine yourself to just one area or honey hole as it change without much notice.

I'm going to relate a few relevant items in regards to common dangers that I read from the latest EBJ issue about 'Deadly Dangers' faced in the backcountry.

**Hypothermia:** You should all be familiar with the importance of layering your clothing. Investing in good high quality clothing can save your life when caught in a rain or snow storm at high elevations. Temperature drop and winds accompany these storms and if you're not prepared you run the risk of hypothermia. Whether you're hunting with a partner or striking out on your own for multiple days it's paramount to recognize the signs of hypothermia.

**Falls:** This may sound strange, but it can happen. One wrong step on a steep mountain or cliff, traversing rocky ground can put you in danger. 1 - Grab on any object on the way down. 2 - Try and break the fall into parts. 3 - Relax your body. 4 - Bend your knees. 5 - Land feet first. 6 - Try to fall to the side. 7 - Protect your head by using your arms. 8 - Get medical help ASAP.

**Extreme Knife/Broadhead Lacerations:** A sharp knife plunged clean to the hilt in your thigh can end more than your hunt. There is no helicopter fast enough to beat the life and death timeline as femoral artery pumps what's left of your life onto the ground in about 3 minutes. Education, caution and basic first aid on a MacGyver type level can keep you alive to hunt another day. Deep severe cuts are rare in ordinary life, but for hunters they are more common due to the increased use of knives and possible lack of attention and carelessness. Sometimes in a hunting situation your mind tends to be elsewhere while you operate a very sharp knife in a very unconventional fashion trying to get the job done quickly even in the dark of night. Basic knowledge of backcountry first aid and a light-weight first aid field kit are a must, but you need the knowledge to cope with severe cuts and how to survive them.

**Tip:** Always use a sharp knife. A dull knife is the most dangerous tool to its user. Always cut away from yourself. Cutting zip tie's seems to get a lot of people in a bind when it comes to a deep, self-inflicted laceration. Never leave a knife lying on the ground while dressing out your animal. If you lose track and sit down on the blade, your will be much more that sorry.

**Lightning Storms:** The up-close experience of an electrical storm at any elevation can change your life. The likelihood of being struck by lightning on a bare, high-country ridge can increase exponentially versus the safety of your backyard. Have a plan and start it as soon as you first hear the boom of thunder in the distance. Lightning does not require rain. As a rule of thumb, use the "Flash to Boom" method to gauge how far away the lightning strikes are from your current location. To measure the lightning distance, just count the seconds from the flash time to the time you actually hear the boom and divide that by five. Any time interval less than 25 seconds and you will need to head off the ridgeline as you are in the danger zone with lightning within 5 miles of your location. The best prevention when hunting on high ridge or mountain when a thunderstorms roll in is to get off the top and into timber. Lying flat on the ground is another last-ditch method effort, but separate yourself from the bow & arrows. This may not be a very effective alternative. I've personally resorted to this after being caught in a lightning storm on a bald high ridge in Utah.

**Tip:** Always keep up with weather reports before heading into the backcountry. Use your cell phone if possible to keep up with the weather. Most of the Garmin products incorporate a weather app and weather channels... use them. When you see lightning, always head for the lower cover. The last place you want to be is on top of a bare granite ridgeline when the fireworks start.

The above dangers can be avoided if using common sense and being prepared mentally for your hunt. Above all, be safe out there this season and use all the precautions and gear available when in the backcountry.

Dave Baker—VP Hunting

## Nor Cal

### What is Nor Cal?

Nor Cal /Legislative  
Representative  
Robert Moore

The full name for this regional group is Nor Cal Bowhunters. They represent the areas 9 archery/bowhunting clubs and 3 archery pro shops to California Bowmen Hunters State Archery Association (CBHSAA). CBHSAA and Nor Cal are chartered to the National Field Archery Association (NFAA). What do Nor Cal and CBHSAA do for Archery or Bowhunting?

There are many facets to their representation of Archery and Bowhunting. CBHSAA is "Dedicated to Promoting and Protecting the Archery and Bowhunting Heritages". This statewide organization speaks for California Archers and Bowhunters in matters concerning Legislation and

Regulation since 1943. The Legislative committee of CBHSAA includes a Coordinator, 6 state area reps and each region group has one legislative representative. Archery is a shooting sport so at times issues arise to limit or exclude the shooting of Bows and Arrows for any purpose. CBHSAA will pursue those actions for the benefit of all Archers and Bowhunters.

The next Nor Cal meeting will be Wednesday August 10<sup>th</sup> at Maya's clubhouse, 7pm.

The next California Fish and Game Commission meeting (CFGF) will be held August 24 and 25 in Folsom. Agenda has not been posted at this writing but items of interest include upland bird regulations of which a change to require broadheads for the take of turkeys.

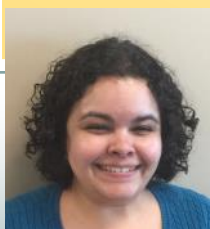

The next Maidu All Skills Archery Classes will be Wednesday, August 3rd starting at 6:30pm to 8:30pm. This will be the last Wednesday class before switching to the winter schedule starting Saturday October 15<sup>th</sup> at 10am to 12pm. Classes are held at the site in range far right side. During these classes the site in range is still open except for the wall of hay and sometimes the 20 yard target for extra-large groups. Thanks to all the members who have used the site in range while the classes have been held to keep safety as a priority.

Maya participated in the Legislative Sportsmen Caucus Shoot held in Rancho Cordova June 22<sup>nd</sup> by setting up and running an archery range in conjunction with Skeet and Trap. Instructors Robert Williams, John Tarro, John Laubinger, Carlos Rodriguez, Johnnie Waddles and Robert Moore manned the range from 6pm to 9pm. The event is held to introduce Legislative Representatives and Staff to the world of shooting sports.
